Potatoes. The initial symptom of blight on potatoes is a rapidly spreading, watery rot of leaves which soon collapse, shrivel and turn brown. During humid conditions, a fine white fungal growth may be seen around the edge of the lesions on the underside of the leaves. Brown lesions may develop on the stems.

Blight: The spores of blight infection can easily spread to tomatoes and potatoes from plant debris left in the greenhouse or garden, so it must be removed and disposed of or burnt. The solution to eradicating these potential problems is to do a deep clean of the greenhouse before the new sowing season begins.
