2.1. The role of adaptive reuse in the modern construction. Adaptive reuse of buildings is considered by most as a superior alternative to new construction in terms of sustainability (Conejos et al., 2015; Douglas, 2006; Langston, 2008). Because of the great impact that the building industry has on the environment, failing to optimize buildings' useful lives can result in their residual lifecycle expectancy not being fully exploited, and with it, wasting the resources embedded.
