transmural care, is a worldwide trend in health care reforms and new organisational arrangements focusing on more coordinated and integrated forms of care provision. It is care that is planned with people who work together to understand the service user and their carer (s), puts them in control and coordinates and delivers services to achieve the best outcomes.

~~Integrated care | Health Education England~~

Integrated care at the micro level Integration of care at the micro level is concerned with the co-ordination of care for individual patients and carers. Many health care systems assign responsibility for care co-ordination to a specific individual or team, often general practitioners and others working in primary care.

~~Integrated care: What is it? Does it work? What does it ...~~

PATH defines health services integration as the organization, management, and delivery of a continuum of preventive and curative health services. We do this in accordance with patient and family needs over time and across different levels of the health system.
