## Introduction to Page Object Model Framework | Selenium Easy

The Page object is an object-oriented class which acts as an interface for the

# Download Free Introduction To

page of your  
Application under  
test. Page class  
contains web  
elements and  
methods to interact  
with web elements.  
While Automating  
the test cases, we  
create the object of  
these Page Classes  
and interact with  
web elements by  
calling the methods

of these classes.

Page Object Model  
(POM) -

GeeksforGeeks

What is Page Object Model? Page Object Model is a design pattern to create Object Repository for web UI elements. Under this model, for each web page in the

# Download Free Introduction To

application, there should be corresponding page class. This Page class will find the Web Elements of that web page and also contains Page methods which perform operations on those Web Elements.
