XT-4000i - Sysmex

Sysmex® XT 4000i analyzers for performing 5 Diff analysis utilize fluorescence flow cytometry. The analyzer enables automatic analysis of CSFs. It provides information on the number of white and red blood cells in CSF, as well as the total nucleated cell (TNC) count and polymorphonuclear (granulocyte) count.

The new UF-5000 and UF-4000, based on our globally renowned fluorescence flow cytometry and with body fluid analysis available at the flick of a switch, will benefit laboratories of any size. Our UC-3500 is a fully automated chemistry analyser that takes test strip analysis further, with both microalbumin and creatinine analysis on board. Adding our digital imaging unit, the UD-10, provides a ...

## XT-2000i - Sysmex

Az XT-4000i egy valóban kimagasló hematológiai analizátor. A Sysmex egyedi fluoreszcencia áramlási citometriás technológiájával az RNS/DNS tartalmát, a sejt méretét és a bels sejt komplexitást figyeli, a pusztán sejt méret helyett. Ez figyelemre méltóan pontos eredményt, valamint kiváló fehérvérsejt differenciálást nyújt.
