MSC Nastran is a multidisciplinary structural analysis application used by engineers to perform static, dynamic, and thermal analysis across the linear and nonlinear domains, complemented with automated structural optimization and award winning embedded fatigue analysis technologies, all enabled by high performance computing. 01:51

MSC Nastran - Multidisciplinary Structural Analysis

MSC Nastran 2004 Reference Manual describes uses of File management, Executive Control, Case Control, Parameters and Bulk Data entries in Nastran. It also provides a good overview of most of the capabilities available in MSC Nastran.

MSC SimCompanion - Aeroelastic Analysis User's Guide of creating finite element models with UAI/NASTRAN. It describes not only the finite element library, but provides general information regarding boundary conditions, loads, and material properties. Part II of the manual provides you with detailed descriptions of the analytical disciplines available in the system.
