## ~~Nutritional Biochemistry | ScienceDirect~~

Nutritional biochemistry is the study of nutrition as a science. While nutritional science is composed of various studies in food components, nutrients, and their function regarding humans and other mammals, nutritional biochemistry specifically focuses on nutrient chemical components, and how they function

The primary operational activity of the Nutritional Biochemistry team is the support of the Clinical Nutritional Assessment profile, which is completed before and after International Space Station (ISS) flights. The crewmembers' dietary intake and body mass are monitored during long-duration missions which may span from 4- to 6-months.
