Taylor Hobson's Talyvel Electronic Level systems provide versatile and precise measurement of angle, level, flatness and straightness. The Talyvel 6 uses a pendulum transducer and interfaces directly to a touchscreen computer to combine exceptionally high accuracy, stability and repeatability with fast response and operational convenience.

Flatness Measurement | Instrument | Tool - Taylor Hobson
Taylor Hobson has been selling electro-optical metrology products since the late 1930s and the range includes Micro Alignment Telescopes (used for checking and setting straightness and alignment) Autocollimators (for accurate measurement of small angular displacements), clinometers and Talyvel electronic levels.

Mission Statement

About Us - Taylor Hobson
I've just purchased a old Taylor-Hobson Talyvel 4. The seller described this as "ancient, but in good working order". For those who are not familiar, this is a precision differential electronic level with two read heads (A and B). It has an LCD digital display with a resolution of 0.1 arcsec and a range of +-600 seconds, and a claimed accuracy of 0.2 arcsec near zero. It can display A, B or A ...

Taylor-Hobson Talyvel 4 - Practical Machinist
Taylor Hobson is an ultra-precision technology company that supplies equipment and instruments for form and surface metrology applications @., 14 November 2020 10-14 November 2020 Taiwan International Machine Tool Show Taichung, Taiwan ...
