Mouth ulcers usually appear inside the mouth, on the cheeks or lips. Ulcers can also appear on the tongue. You may have more than 1 ulcer at a time and they can change in size. Mouth ulcers are not contagious and should not be confused with cold sores.

Mouth ulcers - NHS

Mouth ulcers – also known as canker sores – are normally small, painful lesions that develop in your mouth or at the base of your gums. They can make eating, drinking, and talking uncomfortable....

Read Book Ulcers

An ulcer in the stomach is called a gastric ulcer, while one in the first part of the intestines is a duodenal ulcer. The most common symptoms of a duodenal ulcer are waking at night with upper abdominal pain and upper abdominal pain that improves with eating. With a gastric ulcer, the pain may worsen with eating.

Peptic ulcer disease - Wikipedia

Symptoms and signs of peptic (esophageal, duodenal, or stomach) ulcers disease vary. Some people with stomach ulcers do not have any symptoms or signs while others may have a few or several. The most common symptom of a peptic ulcer is a dull or burning pain in the stomach. The pain may be felt anywhere between your belly button and breastbone.
